

Promote (or learn about) Open Research via a Reproducibilitea Journal Club

david.smailes@northumbria.ac.uk

THE PROBLEMS...

- Promoting Open Research can be difficult without a 'critical mass' in your department.
- It can be hard to find time to learn about new Open Research practices.

A SOLUTION

- ReproducibiliTea journal clubs are a way you can do one/both of these.
- Running at 100 institutions in 25 different countries.
- Open, collaborative initiative, so that reading lists etc. are shared.
- Means that setting up costs (time!) are reduced.

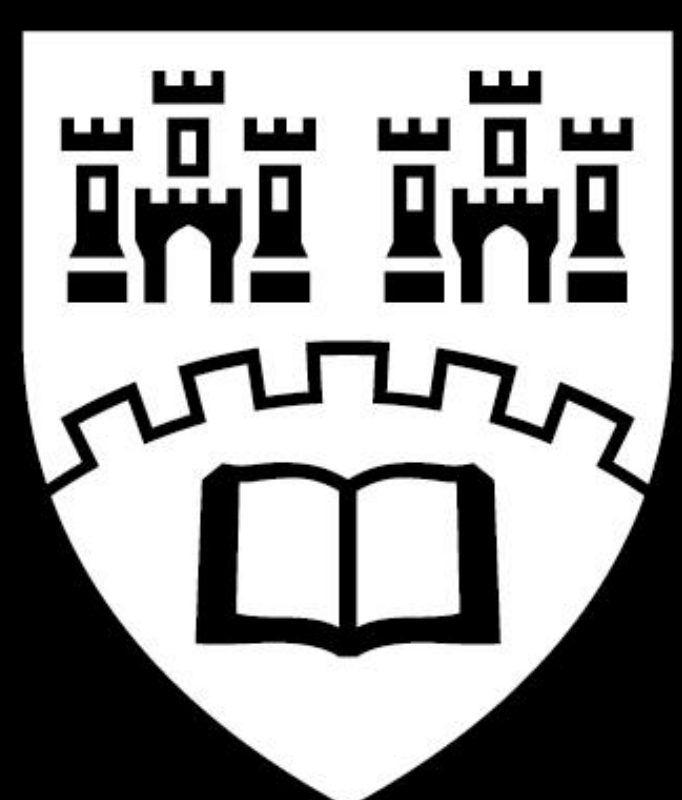

CHALLENGES

- Still requires some time to set up.
- Need to make sure you have enough attendees.
- Pastries help!

RESOURCES
